## **GLG ANNOUNCES FDA'S ISSUANCE OF LETTER OF NO OBJECTION FOR GLG'S EMS95 PRODUCTS**

**Vancouver, B.C. October 6, 2016** - GLG Life Tech Corporation (TSX: GLG) ("GLG" or the "Company"), a global and agricultural leader in the natural zero-calorie sweetener industry, committed to the sustainable development of high-quality zero-calorie natural sweeteners, is pleased to announce that the United States Food and Drug Administration ("FDA") has issued a Letter of No Objection for GLG's enzymatically modified stevia ("EMS") product – specifically "EMS95". (Filing No. GRN 656).

The FDA's Letter of No Objection provides that the FDA has no questions regarding GLG's conclusion – supported by extensive studies, research, and in-depth consultation with GRAS Associates, LLC – that its EMS95 product is Generally Recognized As Safe ("GRAS") as a general purpose sweetener.

EMS95 is part of GLG's TasteBoost™ product line, which consists of a series of enzymatically modified stevia products. GLG's EMS – a natural low-calorie sweetener – is produced through the enzymatic addition of glucose moieties to the original steviol glycoside structure, resulting in a mix of glucosylated steviol glycosides and steviol glycosides. The presence of glucosylated steviol glycosides benefits products using EMS by providing enhanced taste quality and sweetness.

This enhancement in taste and flavor provides a well-rounded, sugar-like low-calorie solution appropriate for a wide variety of food applications, such as dairy, snacks, baked goods, cereals, sports nutrition products, and many more. Furthermore, GLG's EMS products can be used synergistically with other caloric and non-caloric sweeteners for enhanced sweetness and taste. GLG's EMS products provide an array of choices for food manufacturers targeting consumers of all ages who are looking for healthier, tastier options.

To date, GLG has received ten GRAS Letters of No Objection covering its broad array of high-purity stevia products. No other stevia company can claim such a mark.
